# 2006 Wood Design Conference

## What's New in Wood Construction?

WOOD, the first choice for generations and the world's only renewable building material. Join us to learn how and why WOOD really does WORK! This half-day seminar will cover the latest information on wood use in non-residential construction. Our panel of experts will address crucial aspects such as building code requirements, state-of-the-art timber engineering and innovative uses of wood in architecture.

Sponsored by the Canadian Wood Council and the Wood *WORKS!* project, this concise conference will provide the latest information on designing and building with wood.

## Who Should Attend?

This seminar is tailored for the decision makers in the construction industry - **architects, designers, engineers, contractors, technologists, technicians, builders and building officials** - the people who need to know what products are available and how they can be used.
